

Consumer Product Recalls

Recall Notice

Date

June 2009

Product Name

Lobster Teether and SeaPals Water Teethers by Infantino

Full Product Description

This recall involves the Lobster Teether and the Sea Pals Water Teethers by Infantino.

The Lobster Teether body is red and is in the shape of a lobster, with liquid-filled purple claws and can be identified by style number 150-3058 and UPC 773554030587.

The Sea Pals Teethers are packaged in a box containing two teethers: the Lobster Teether (as previously described) and a fish-shaped teether with a yellow body and a liquid-filled blue tail. The Sea Pals Water Teethers can be identified by style number 153-3063 and UPC 773554030631.

Hazard Identified

Health Canada requires that infant teether fillings not contain any living micro-organisms. Testing by Health Canada of the lobster teether has revealed that the liquid filling of the teether may be contaminated with the bacteria *Burkholderia tropica*. These bacteria generally do not cause illness. However, the bacteria may cause infection in children with weakened immune systems, if the teether is punctured and the liquid filling from the teether is ingested.

Neither Health Canada nor Infantino have received any reports of incidents or injuries related to the use of this product.

For some tips to help consumers choose safe toys and to help them keep children safe when they play with toys, see Health Canada's [Toy Safety Tips](#).

Corrective Action

Consumers should immediately take the recalled teethers away from children.

For more information, consumers may visit [Infantino's website](#), or contact Infantino at 1-888-808-3111 or by e-mail at recall@infantino.com.
